

K&S advanced systems

The Most Advanced Vibration Absorption Systems

SOTOMDXXX - SOTO MODULAR

A lightweight and compact vibration absorption systems allows to significantly reduce unwanted vibrations translated to working environment from various environment disturbances. Developed by engineers, physicists, and leading industry consultants with expertise in vibration isolation and precision instruments, **SOTOMD** effectiveness at significantly absorb vibrations and disturbances.

SOTO MODULAR Products Line - Vibration Absorption Systems

SOTOMD Products Line	Device Capabilities	Device Dimensions (mm)	Load Capacity (kg)
SOTOMD300	Vibration Absorption System	120x110x75 single isolator	Single Isolator can carry load up to 300kg.
SOTOMD500	Vibration Absorption System	120x110x75 single isolator	Single Isolator can carry load up to 500kg.
SOTOMD	Vibration Absorption System Stationed on multiple independent isolators	120x110x75 single isolator	Total load capacity for 4 isolators = SOTOMD x 4

SOTO MODULAR customized solutions available
